Redux
PostgreSQL
MongoDB
Python
HTML5
CSS3
Bootstrap
Git
AWS

PERSONAL SKILLS

Creative spirit
Positive mindset
Reliable and professional
Organized
Time management
Team player
Fast learner
Motivated

ABOUT ME

After working with a close family friend who is a software developer, I began teaching myself how to program for fun. Hobby turned into habit and my coding journey began to explore my curiosity of technology and the creativity behind it. I discovered my passion for programming over two years ago and never looked back. I'm a full stack developer with a focus on front-end development excited to work within an agile environment.

FEATURED PROJECTS

Movies With React - Github| Live Demo
- React, SVG, AWS
- Movies With React is an application which keeps you up to date with new movie releases by constantly updating itself when new movies come out.
- It also allows you to search for movies that have been released or upcoming and get various information about them such as release date, rating, the cast, and more.
- This app is perfect for someone like me who is a movie person and wants to know all the latest movies being released as well as information about older movies.

Burger Builder - Github| Live Demo
- React, Redux, Firebase (front-end, back-end and authentication)
- Burger-builder does exactly what the name suggests. It allows users to create a delicious burger and shows the toppings being added visually as well as the price based on the combination of toppings added.
- Users must first create an account before being able to order, checkout and view their orders. On smaller screens, a sidebar is also viewable.

Weather Conditions - Github| Live Demo
- Python3, Tornado (back-end), Jinja2, Peewee, Boto3 and jQuery
- Current weather conditions allows users to get the weather conditions for a city or zipcode anywhere in the world using the OpenWeatherMap API.
- Also uses IpInfo API which allows users to get weather conditions based on the ip address that they are connected to.

WORK EXPERIENCE

Photobooth Manager - The Houston PhotoBooth   Jan 2016 - Present
- Started as a worker and moved to a management position in 6 months.
- Create print out templates using Darkroom Booth3.
- Go to various events (weddings, birthdays, parties) and give excellent customer service to guests and host, making sure to be punctual to have ample time to set up.
- Collect payments and manage finances.

EDUCATION

DigitalCrafts Immersive Coding Bootcamp   Sep 2017 - Jan 2018
- Sixteen-week intensive, full-time accelerated learning program.
- Curriculum covers practical applications, pair programming, and debugging techniques for: Python, JavaScript, Node.js, PostgreSQL, Express.js, React.js, Redux, HTML5, CSS3, jQuery, Amazon Web Services, Firebase, and more.

University of Houston   Jan 2013 - May 2017
- Bachelor of Business Administration (BBA) in Finance
